

August 5, 2003

O.V. Delle-Femine
National Director
AMFA National Administration
67 Water Street, Suite 208A
Laconia, NH 03245

Dear Mr. Delle-Femine:

During the recent restructuring negotiations, Letter 94-5 of the Mechanics' Agreement was amended to provide protection from layoff for employees with seniority of January 1, 1990 or greater. Along with the initial date revision, language was adopted to provide for a one-time adjustment to the protection date under certain circumstances.

Specifically, the language states:

To the extent that, between May 1, 2003 and June 30, 2003, inclusive, the total number of retirements and separations by active employees on the mechanic classification seniority list who are senior to January 1, 1990 falls short of 600, the protected date will be revised to exclude that number of mechanic positions. This adjustment to the protected date will take effect on July 15, 2003.

The analysis of employees meeting the stated criteria is complete. The total number of eligible employees is 265, leaving a shortfall of 335. Accordingly, we have excluded that number of mechanic positions from contractual layoff protection and adjusted the protection date back to October 30, 1989.

Our records indicate that 60 mechanics share a company seniority date of October 30, 1989 and that the precise line, based on excluding 335 positions, would be drawn excluding 21 of the 60 individuals hired on that date from layoff protection. In order to have a clean date for administrative purposes and not to disadvantage anyone on such a fine line, the company will include everyone with October 30, 1989 or greater seniority when making the adjustment.

We will be happy to meet with your designated AMFA representatives to review our process and share the pertinent data.

Sincerely,

A handwritten signature in cursive script that reads "Peter B. Kain".

Peter B. Kain
Vice President
Labor Relations

Mechanic Classification Retirements and Separations (in accordance with Letter 94-5M criteria)
